

Southlake Dermatology Newsletter

Special Edition

August 2009

The end of summer is approaching and school is about to start! Now is the time to book your appointment to restore your skin from all your fun outdoor activities. Fraxel and our chemical peels are the most popular procedures chosen for this type of correction.

Dr. DeBuys' last day with us with July 31st. She is considering embarking on her own practice either in the Alabama or the metroplex. We wish her the very best with her endeavors.

We are excited to announce that we hired an additional physician assistant, Cheryl Hickey, PA-C who should help our wait time for appointments. She has over 10 years of dermatology experience and is a great asset to our staff. Beth Jouett, PA-C continues to play a vital role in the practice. Both Cheryl and Beth are well-trained in sclerotherapy for those considering treatment in the fall.

Make sure you visit our website if you haven't created your own personal or family account. If you have a medical question just go online to Ask our Staff, which will allow us to communicate via email with our patients. We also communicate via email for pathology results and billing issues.

Dysport and Restylane Duo

Medicus just launched Dysport which is a botulinum toxin that is competing with "Botox Cosmetic." Our practice was chosen to participate in an offer to our patients to try both products. If you purchase 2 syringes of Restylane you will receive an area of Dysport free. Get rid of your frown or crow's feet!

Radiesse to the Rescue

Actual RADIESSE patient. Individual results may vary.

Radiesse continues to be a great value to help plump out the folds and creases in the cheeks. We can also use this natural filler to augment the cheek bones, soften the jowls and restore your hands to a more graceful appearance. \$100 off your treatment when you bring in this email.

Tighter Firmer Skin

Using radiofrequency, Accent promotes the creation of new collagen and can improve the appearance of loose, sagging skin and cellulite anywhere on the body. Accent treatments tighten the skin and make it look smoother, all with no down time. Patients often choose their thighs, lower face and neck or abdomen for treatment.

Skincare Products

[Obagi](#) can help lighten your sun-induced solar lentigos (brown spots). Summer's end is the perfect time to start your regimen and get ready for the busy fall season. [Click for more details.](#)

[SkinMedica Hydrating complex](#)

This hyaluronic acid rich serum replenishes skin's moisture reservoir and provides instant and long term hydration. Using this complex will enhance the benefits of your daily moisturizer.

[Elta MD UV Clear SPF 46](#)

Excellent new sunscreen for acne prone skin. Contains 9% zinc oxide and niacinamide and is light and transparent. Oil-free. We have had great feedback on this new addition!

We are here to service all your skincare needs. Please contact us if you have any concerns. We also encourage feedback from our patients to help make your experience with us warm and inviting.

Sincerely,

Southlake Dermatology
